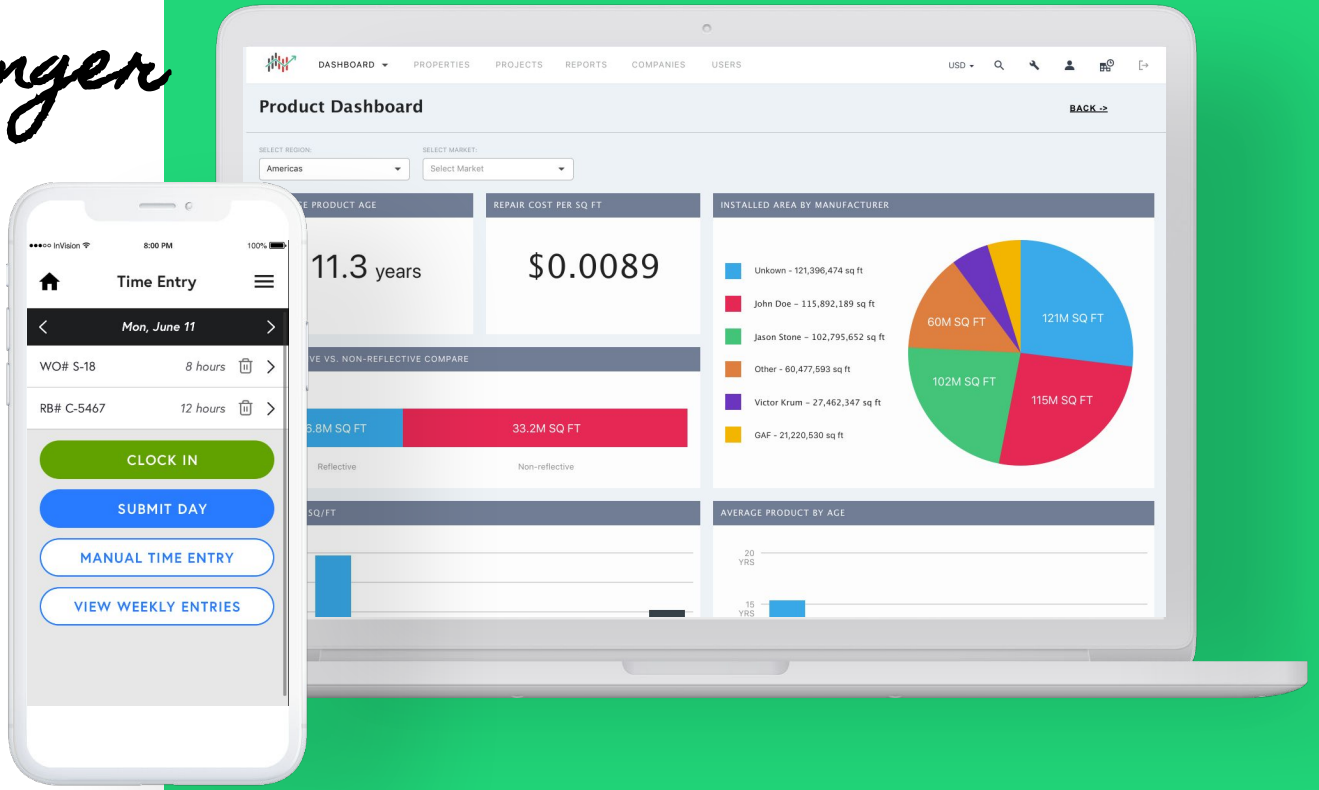
Digital Time & Field Data Collection

is a Game Changer



SPARK
Business Works

Bob Armbrister

President/CEO
SPARK Business Works

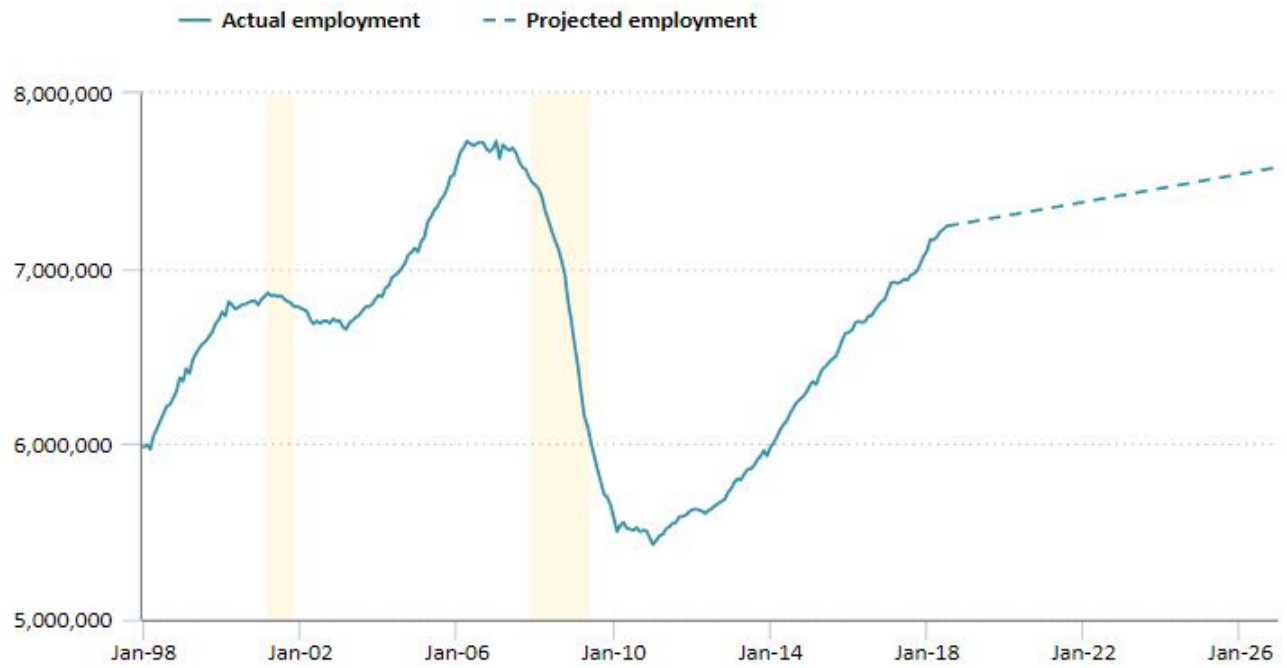
It’s 2020

Why are we talking about field data collection?

Because it’s still a struggle for a lot of companies!

EXTERNAL

Chart 1. Construction industry employment, January 1998–July 2018 (seasonally adjusted) and projected 2026



Note: BLS does not project specific data for each of the interim years to the 2026 projection point. These years are expressed as a dashed straight line. Data for June and July 2018 are preliminary.
Shaded areas denote Recession as determined by the National Bureau of Economic Research.
–
Source: U.S. Bureau of Labor Statistics, Current Employment Statistics survey (1998–2018 nonfarm wage and salary employment, seasonally adjusted) and Employment Projections program (2026 projected employment).

What Are the Results of the Construction Labor Shortage?

44%

reported they have had to increase cost on projects

500+ Job Sites & Facilities

What did we learn?

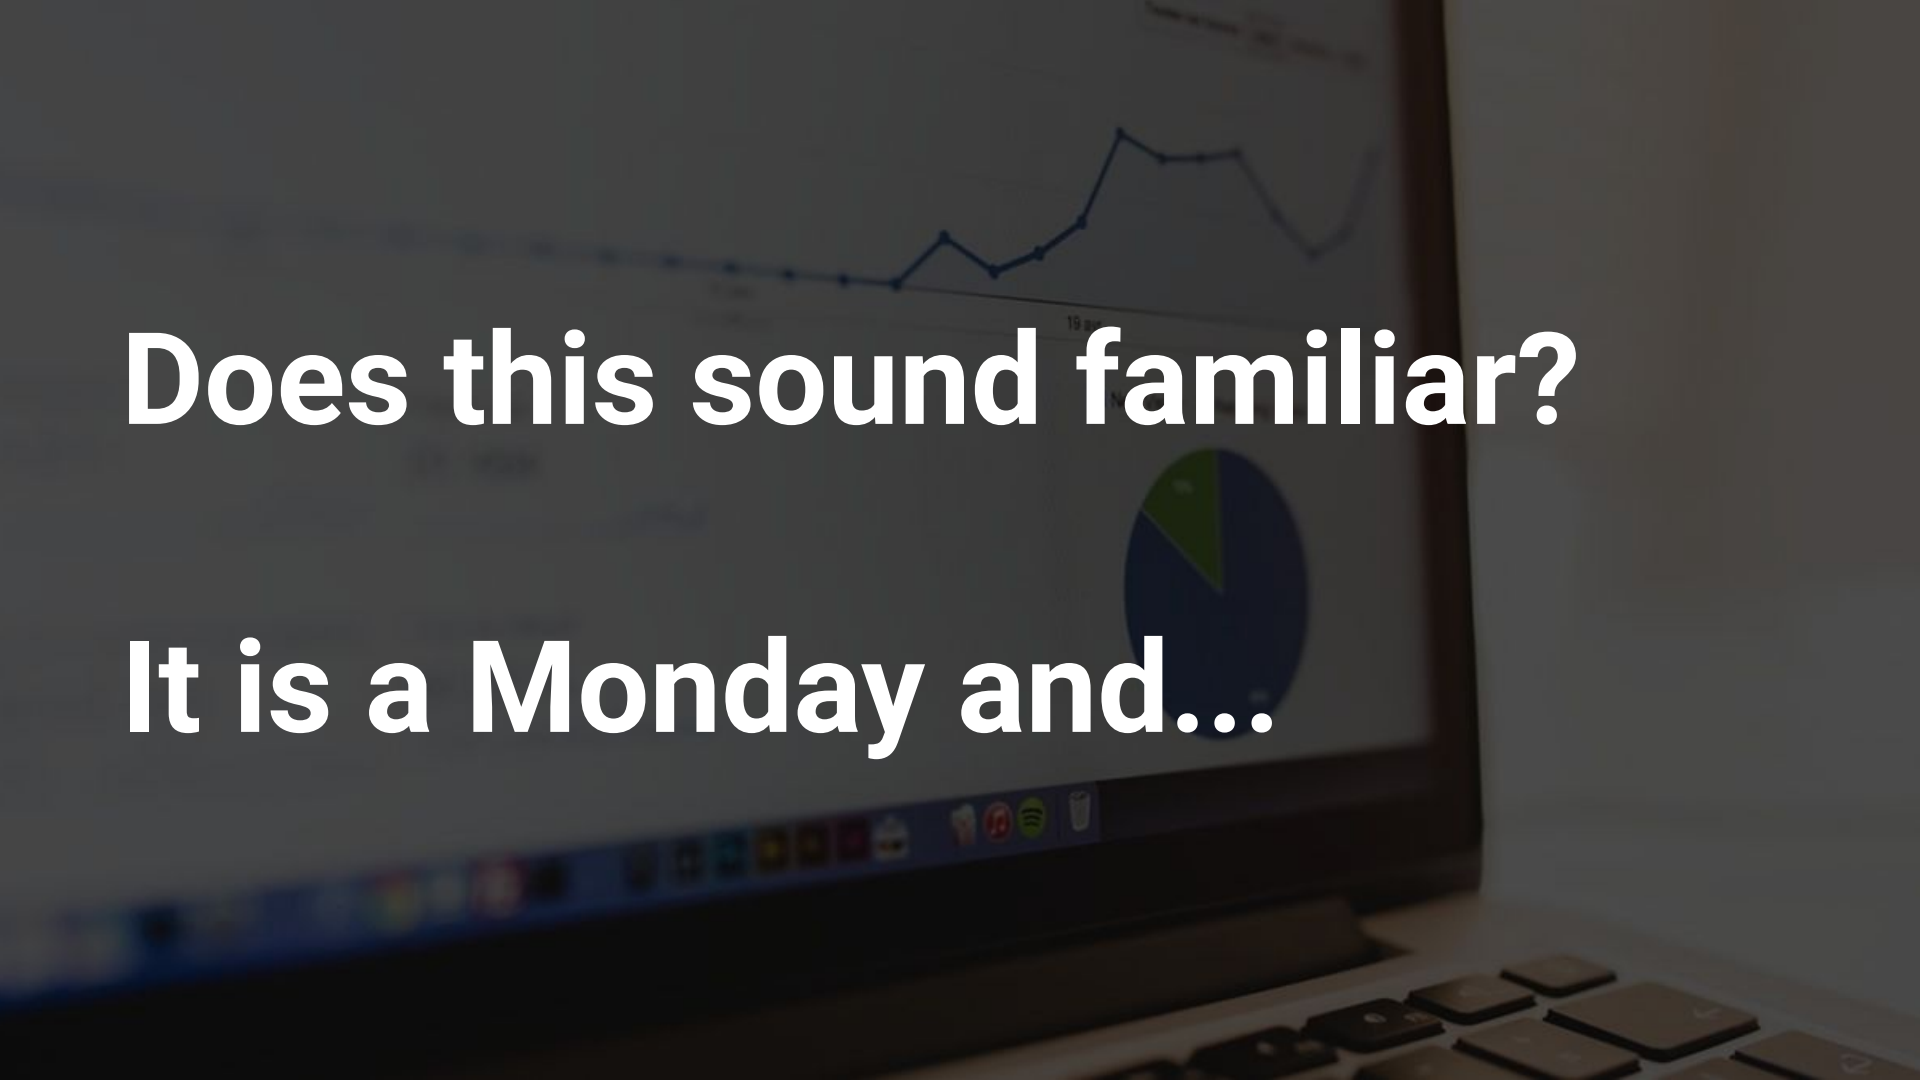
Technology adoption is getting **easier** in construction

Team members are willing to **use their own devices**

Data can be **entered daily**

It works when it is **Easy, Fast & Simple**

OK this is one example...what else is happening?



Does this sound familiar?
It is a Monday and...

Payroll is due...

Betty makes sure all crew time is reported...

Vectors by Vecteezy

Betty checks a stack of time sheets and notices this...

Vectors by Vecteezy

ACME Construction												Day:	Date:

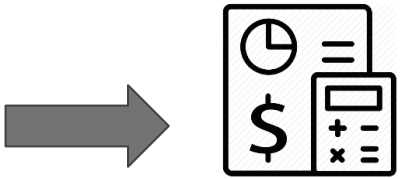
Details
Forgot to include my time on the time sheet. Here it is...
Did you use any equipment?
An electric power pack
You worked two days last week?
I also worked on Saturday for 2 hours. Thanks Betty
iFakeTextMessage.com

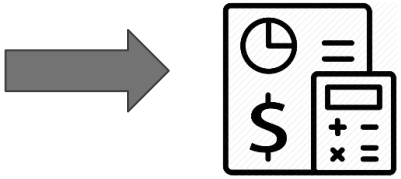
Betty processes Kevin's time for payroll and job costing...



Payroll

FOUNDATION software

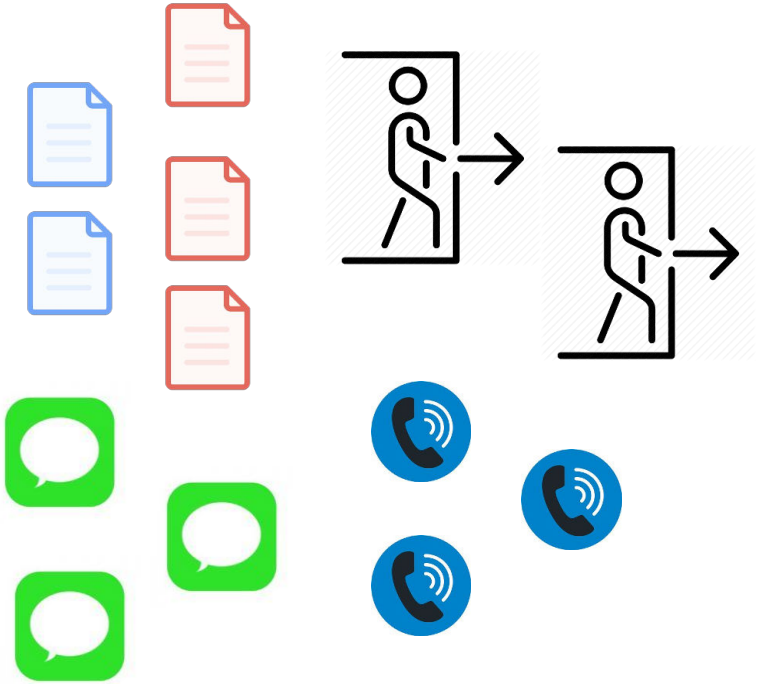
ComputerEase



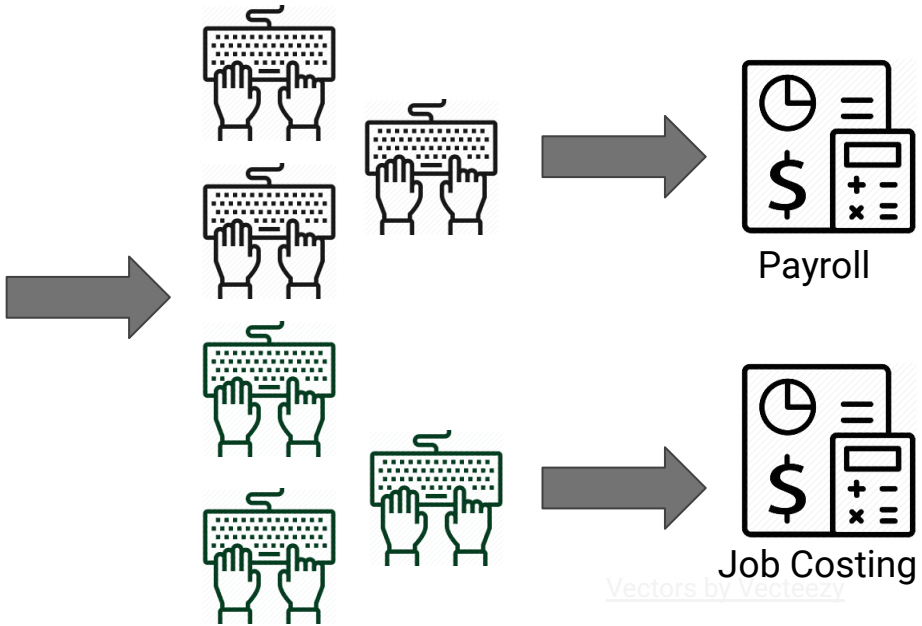
Job Costing

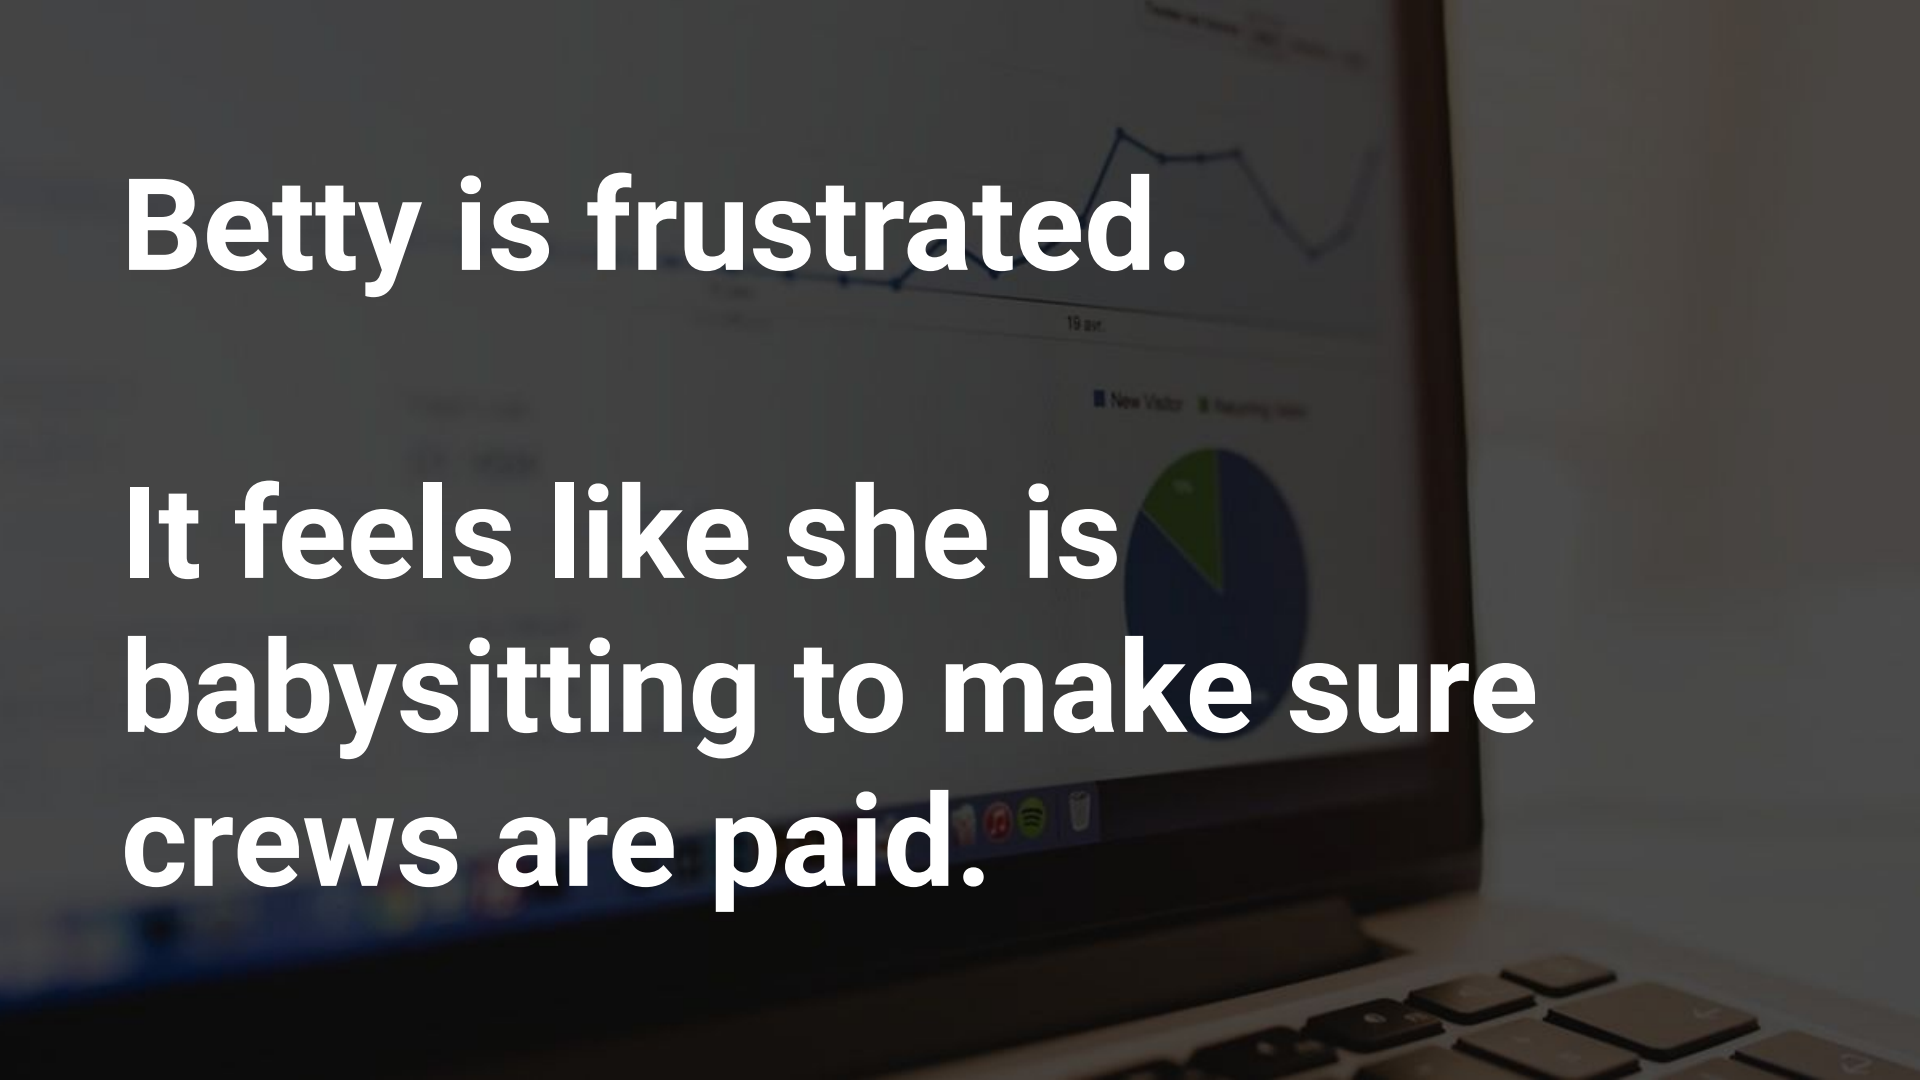
sage

Helps everyone make sure their time entry is complete...



She manually enters all payroll and job costing...



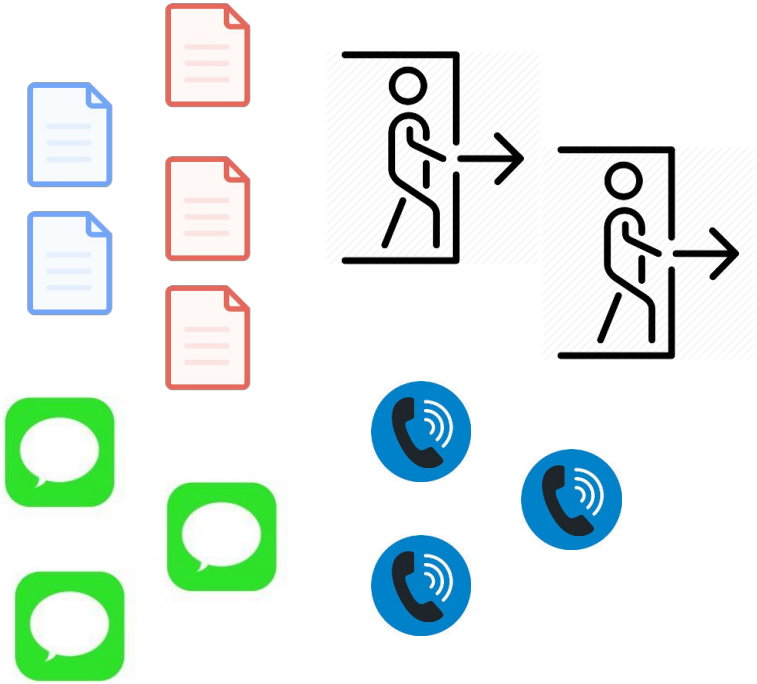


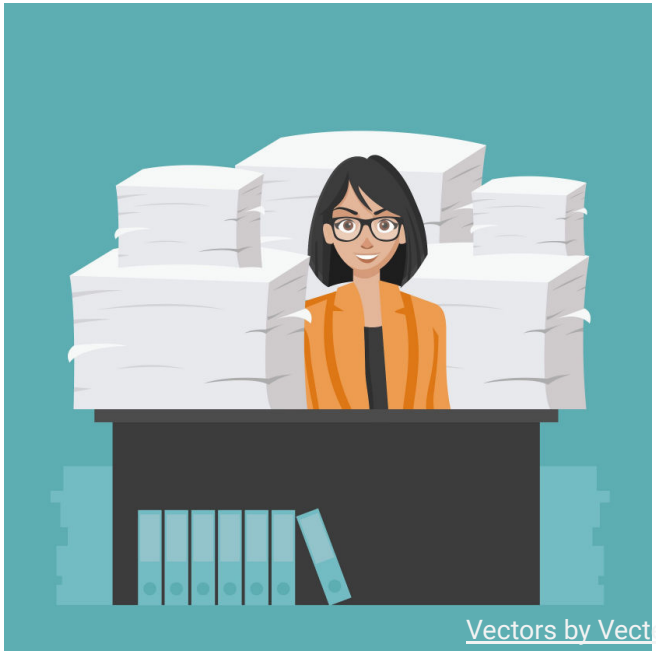
Betty is frustrated.

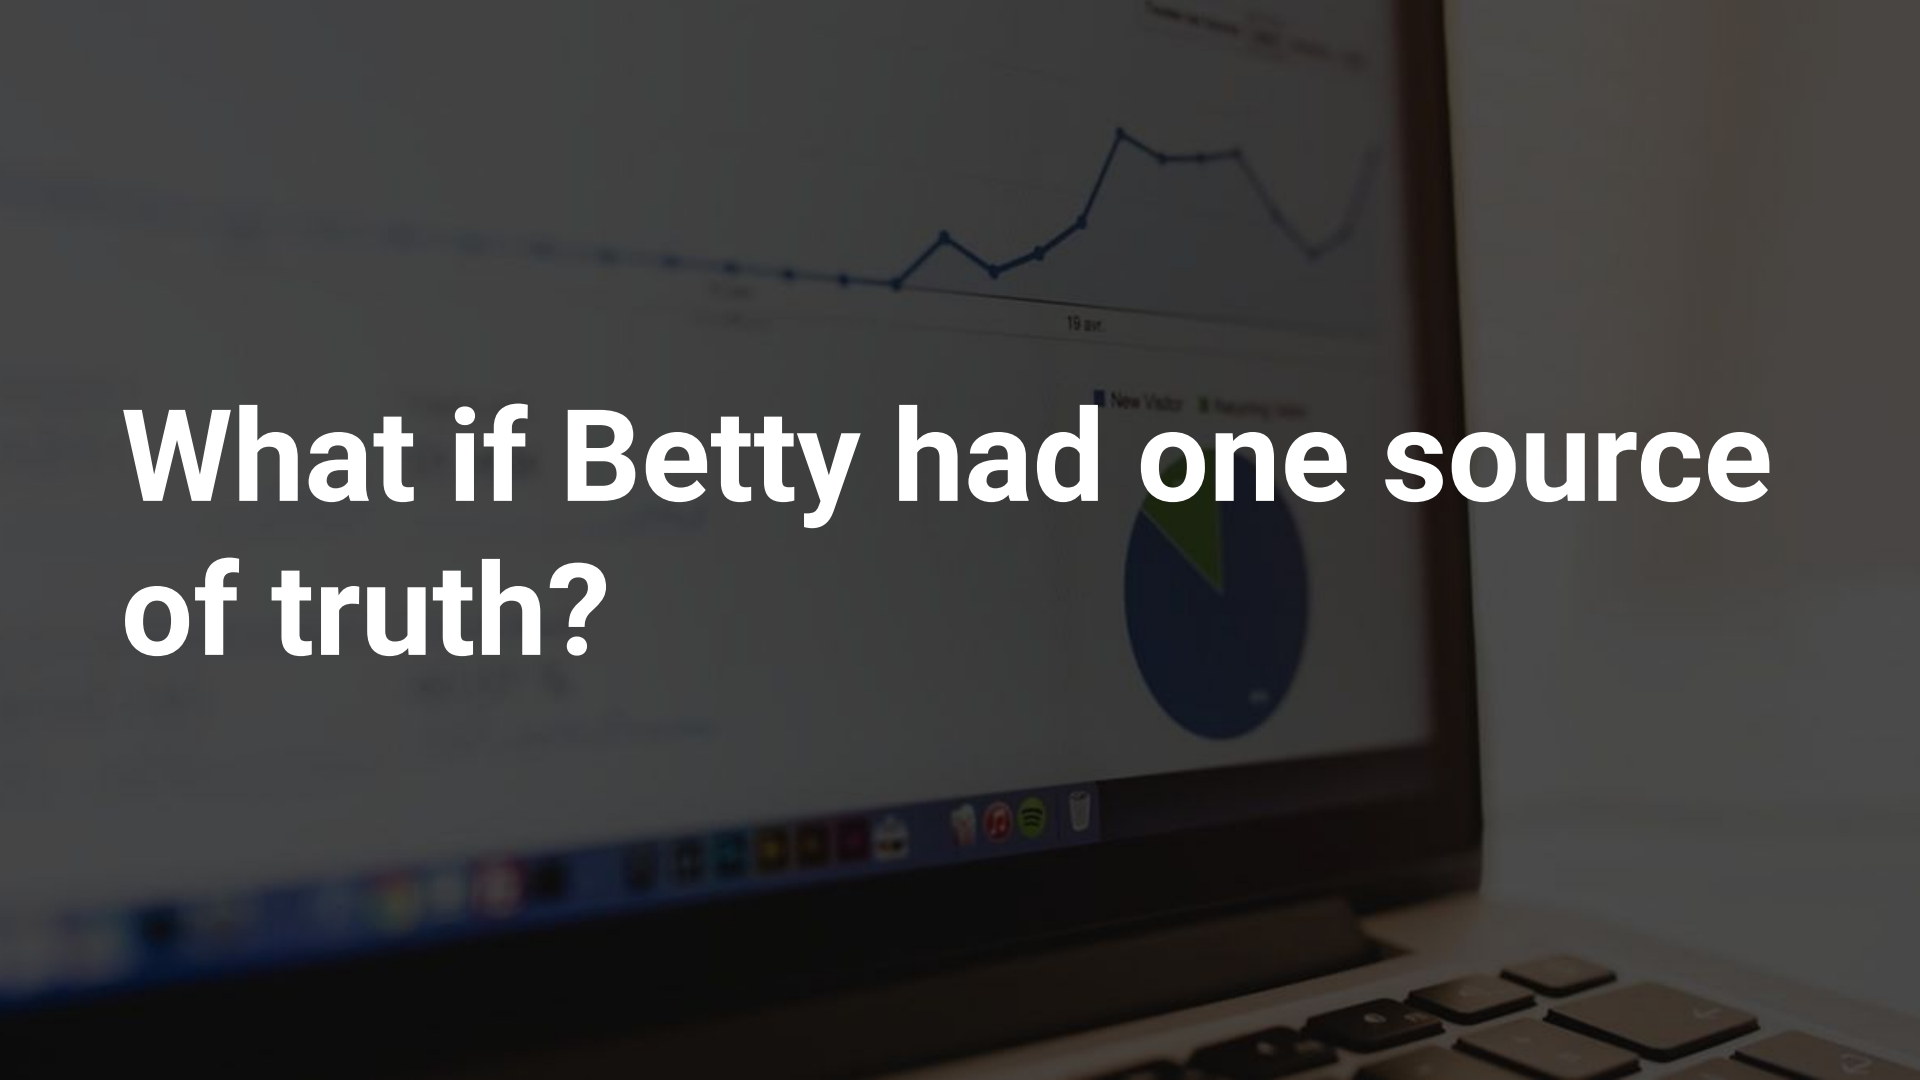
It feels like she is babysitting to make sure crews are paid.

Time is wasted from
double-entry and follow-up

Betty needs to get rid of the many ways time is reported...







What if Betty had one source of truth?

Digital time tracking is a starting point

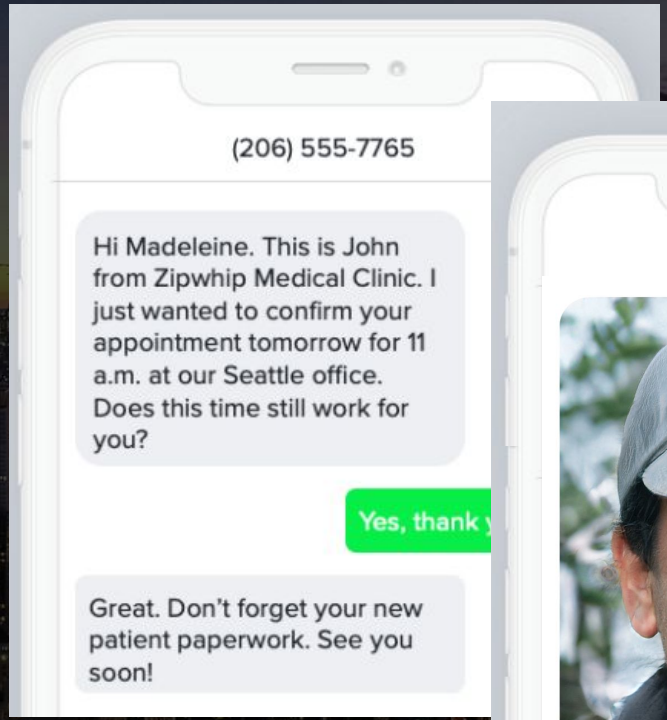
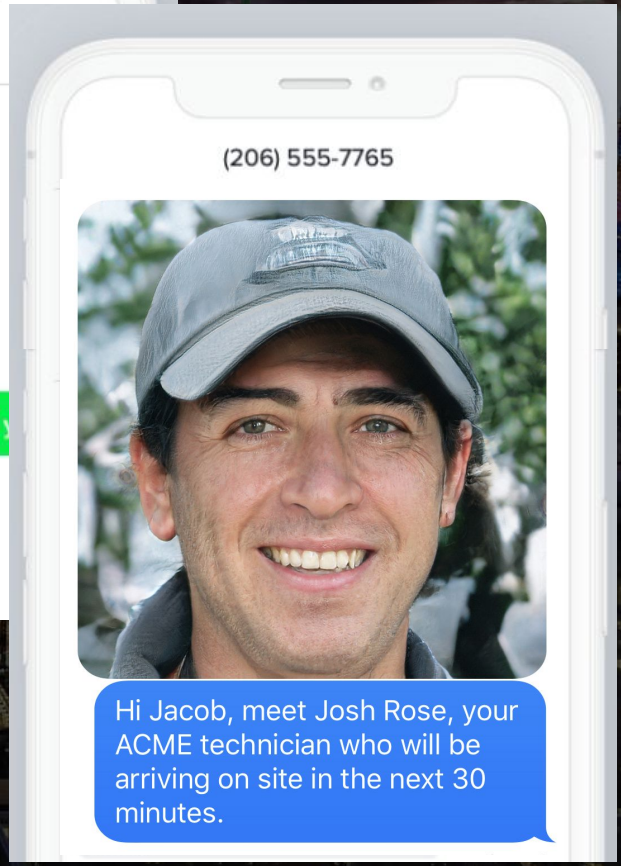
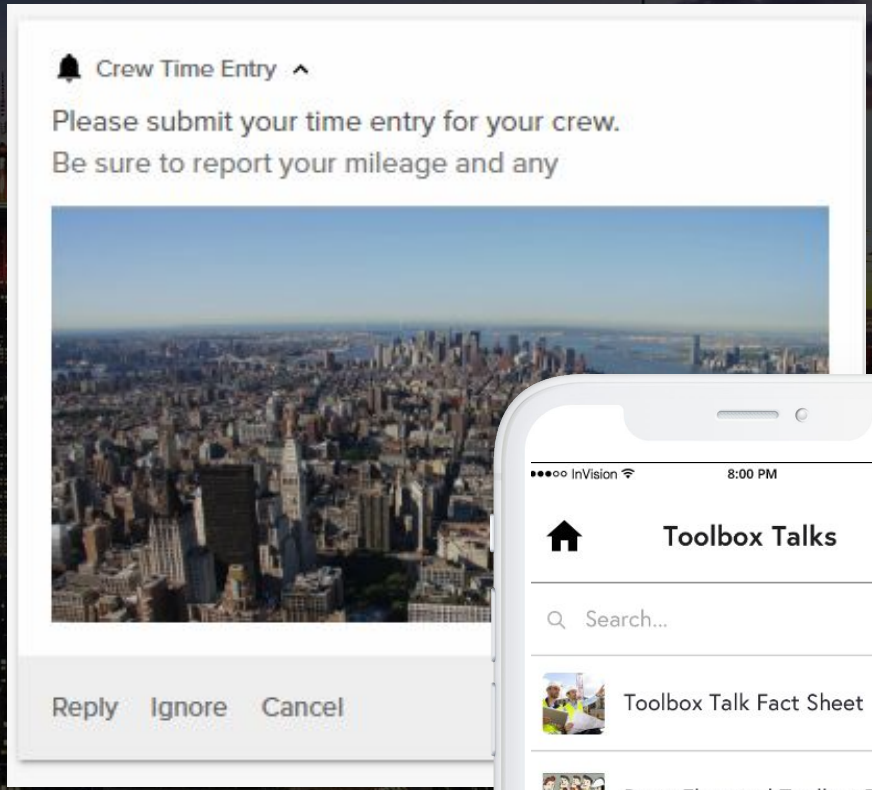
So, what technology is being used to increase automation on mobile devices?

Text Messaging

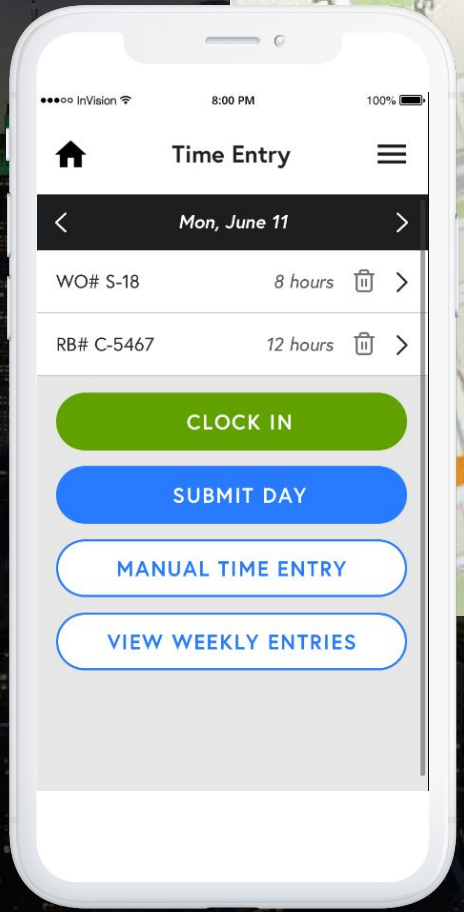


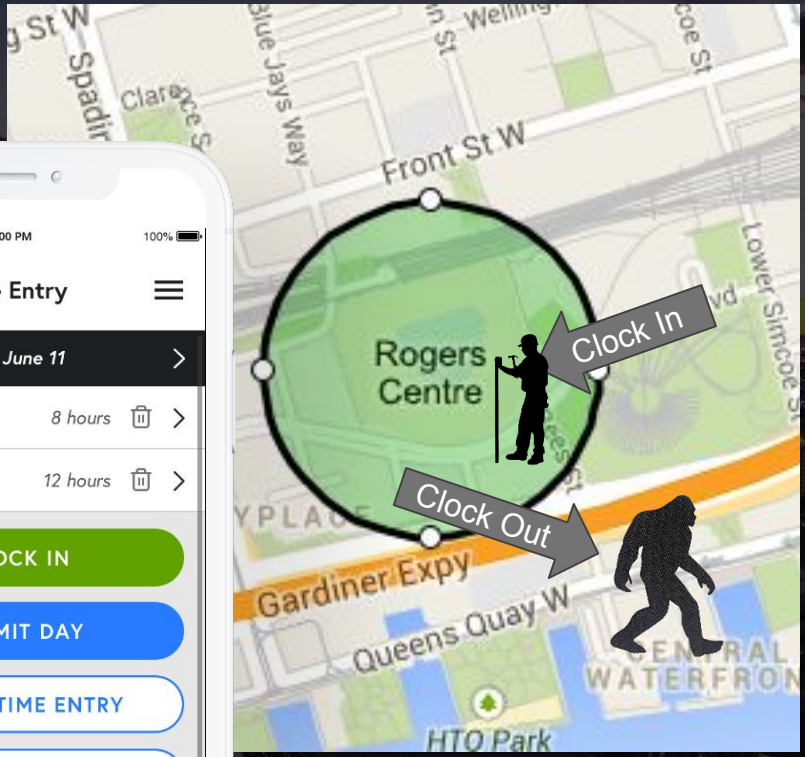


Push Notifications



GPS & Geofencing



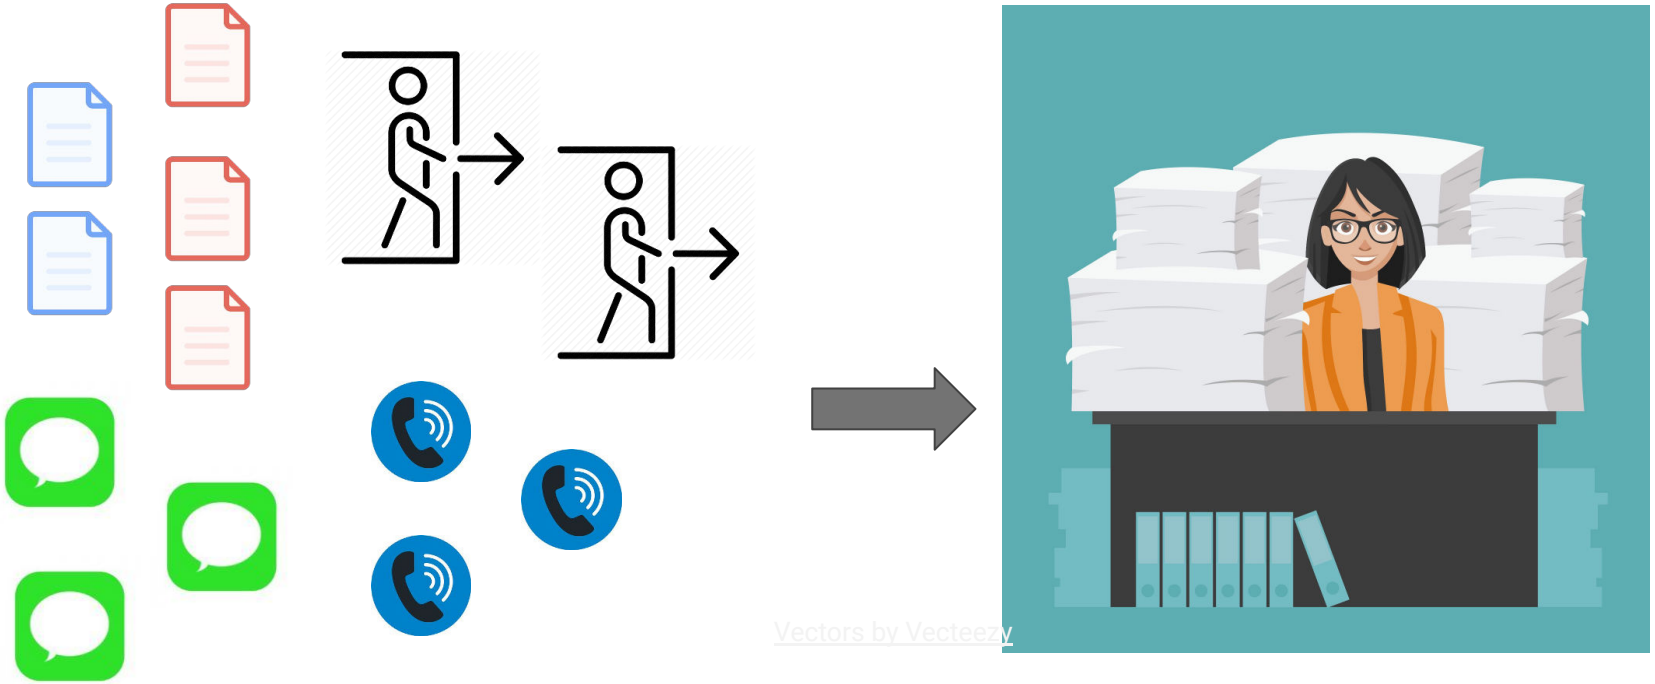


5G network is here
10 - 100x faster than 4G/LTE

How could your company use these tools?

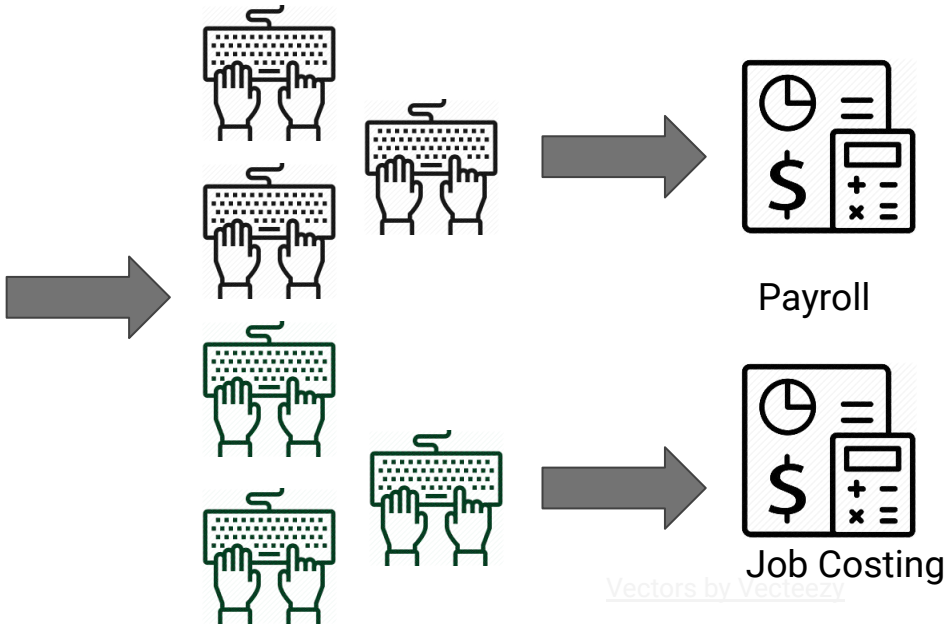
Let’s imagine this for a moment...

Rather than Betty getting time and field data from...



Vectors by Vecteezy

And manually entering Payroll and Job Costing...



It could be like this...
